Technical Skills

Languages: Java, Python, HTML/CSS, JavaScript, C++/C, Arduino

Tools: React, Node.JS, Selenium, Figma, Git, Github, After Effects, Illustrator, Microsoft Office, Adobe Suite, SolidWorks

Projects

AI-DE | *HTML, CSS, Javascript, Figma*

- Designed a mock-up web app with an employee dashboard, client data formatting tool, and profile matching system for a business competition (DECA)
- Pitched the project at DECA Provincials, qualifying for Internationals (ICDC) with a top 10 placement in Ontario
- Created a UI/UX tailored to KPMG employees, improving clarity, efficiency, usability of the platform

Who The Opp? | *Java, Illustrator, Figma*

github.com/ahha220/Who-The-Opp

- Developed a detective game with timed investigations, clue hunting, and suspect deduction for ICS4U1 final project
- Implemented OOP, sorting algorithms, data structures, and interfaces to complete project requirements and improve bulk steps by 10%
- Co-designed UI/UX to address navigation challenges, improving clarity and a more engaging player experience

Baymax Robotic Crane | *C++, Arduino, Motor Control*

- Designed and built a robotic crane capable of transporting blocks under 45 seconds, achieving consistent task completion in competitive trials
- Programmed control systems in Arduino/C++ for precise motor coordination, movement, and positioning
- Integrated motors, controllers, and sensors to enable automated block detection, lifting, and placement

Leadership & Work Experience

Automation Developer/QA

January 2026 – Present

CIBC

- Developing automation scripts for QA testing environments that reduce workflow time by 15%
- Designed and executed test cases and regression tests for internal banking platforms, documenting defects and verifying fixes to improve product stability

Student Council President

August 2024 – June 2025

Markville Secondary School

- Elected by a 1500+ student body, entrusted with leading school-wide initiatives such as spirit events, carnivals, and fundraisers aimed at improving student engagement
- Directed a 25+ member council to plan and execute monthly events with 700+ participants, fostering school spirit
- Increased student engagement by over 20% by leveraging prior leadership experience and strengthening communication between students, staff, and administration

Robotics Executive

November 2022 – April 2024

Markville Secondary School

- Led the onboarding process of 20+ new members with 10+ technical slide to teach VEX parts, mechanical design, and coding fundamentals to build their technical foundation for team projects
- Represented the team at club fairs, to recruit 15+ new members, coordinated fundraising logistics, and contributed to robot design, coding, and marketing to support team projects and events

Marketing Organizer

February 2026 – Present

Hack the North

- Developing initiatives and campaigns to promote Canada's largest hackathon and engage a global community of hackers

Awards

DECA Provincial Champion

2025

ICDC Qualifier

- Placed top 10 in Ontario and competed internationally using AI-DE in a business competition

Student Council Citizenship Award

2025

- Awarded to a council member that demonstrated leadership and collaboration

Education

University of Waterloo

2025 – 2030

Bachelor of Applied Science in Systems Design Engineering
